Art Unit: 1765

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 to 6, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanino et al (6,187,279).

The Tanino et al reference teaches a layered silicon carbide product and a process of creating the layers. On a single crystal alpha SiC substrate a layer of beta polycrystalline layer is placed. The resultant structure is then heat treated in an inert atmosphere at temperatures up to 1900°C. The heat treatment causes the polycrystalline layer to become a single crystal and orientated in the same direction as the substrate, note entire reference. The sole difference between the instant claims and the prior art is the orientation of both layers. However, in the absence of unexpected results, it would have been obvious to one of ordinary skill in the art to

determine through routine experimentations the optimum, operable orientations in the Tanino et al reference in order to increase the uniformity of the crystal growth.

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanino et al (6,187,279).

The Tanino et al reference is relied on for the same reasons as stated, supra, and differs from the instant claims in the addition of another layer. However, in the absence of unexpected results, it would have been obvious to one of ordinary skill in the art to determine through routine experimentations the optimum, operable interlayer in the Tanino reference in order to aid in the conversion to a single crystal.

Response to Applicants' Arguments

Applicant's arguments filed June 10, 2003 have been fully considered but they are not persuasive.

Applicants' argument concerning the Miller Indexes is noted. However, it is well known in the art that crystal have Miller indexes and different ones can be used during the formation of new crystals. Further, since the indexes create different growth fronts due to atom placement and size, this effects the growing crystal. One of ordinary skill in the art with this knowledge would obviously know to use different indexes to create different crystals. The reference is not limited to one specific indexes and does not state do not use the claimed indexes.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1765

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
